WHAT TO DO IN CASE OF AN ACCIDENT

According to the National Safety Council, one in every eight drivers will be involved in a motor vehicle accident this year. That may mean you! Are you prepared? Would you know what to do and what questions to ask?

Here is a list of 11 easy steps to remember, as compiled by the National Safety Council:

- **Stop your vehicle** if it is clear, safe and legal.
- **Move the vehicle** out of the traveled roadway, if it is clear, safe and legal. (In some states it is against the law to move the vehicle from the place where the accident occurred. Check the ordinance in your area.)
- **Turn off the ignitions** of the cars involved.
- **Make a first aid check** of all persons involved in the accident.
- **Call the police** and, if necessary, emergency medical services.
- **Mark the scene of the accident** with flares or reflective triangles.
- **Gather the names*** of all persons in the motor vehicles and people who witnessed the accident.
- **Make a quick diagram** of where the vehicle occupants were seated and indicate the vehicles' direction of travel and lane. Also note the date, time and weather conditions.
- **Ask to see the other driver's license*** and write down the number.
- **Exchange insurance company information.** DO NOT discuss "fault" or make statements about the accident to anyone but the police.
- **Get a copy of the police report** of the accident from the local precinct.

**Use this [accident report form](#) to help you gather the required information.*
